

Earth Carer Kids

Let's go to the rescue! **RESOURCE RESCUE!**

DID YOU KNOW...

As well as food scraps & leftovers, worms like old cotton socks and T-shirts, towels, paper cups – all sorts of organic unwanted things that aren't good enough to give away. They don't have to become rubbish! Do **YOU** experiment with your worm farm?

What's left of an old T-shirt, cap and jeans? Just the bits that aren't organic! Can you spot the tag, visor and zip?

'Even little litter makes me sick'

Little bitty litter is a **BIG** problem. Tiny bits of plastic everywhere put little and big animals in **DANGER**. When we make less litter we **RESCUE** wildlife! Can **YOU** help stop littering?

Even old cans can be recycled! The aluminium is still valuable. Recycling uses less electricity, water and fuel than making new aluminium. Do **YOU** notice cans and other aluminium that can be recycled?

'THESE aren't really rubbish!'

CAN YOU IMAGINE...

ALL the things that get wasted that aren't **REALLY** rubbish?

LOTS of useful things are in danger of being wasted.

Too much good stuff goes in the bin!

How can we **RESCUE** them? Reduce, Re-use & Recycle!

What do **YOU** Reduce, Re-use and Recycle?

That's **RESOURCE RESCUE!**

Tell us your **Resource Rescue** stories.

Send a picture!
